PROFESSIONAL EXPERIENCE

Database Administrator & EUC/Desktop Support Analyst

Telkom Kenya | Nairobi, Kenya
February 2023 – Present

Role Focus: 70% End User Computing/Desktop Support | 30% Database Administration

- Deliver onsite and remote technical support for over 200 users, resolving hardware, software, and connectivity issues.
- Perform hardware break-fix, desktop deployment, imaging, and IMAC activities.
- Troubleshoot Windows 10/11, Microsoft 365, Outlook, Teams, VPN, and endpoint-related issues.
- Administer Active Directory user accounts, access permissions, and password resets.
- Manage incidents and service requests through ITSM tools while ensuring SLA compliance.
- Support VIP users, meeting room technologies, and audiovisual systems.
- Maintain IT assets, endpoint security compliance, and device lifecycle records.

Key Achievements

- Improved SLA compliance from **30% to 80%** through effective ticket management and prioritization.
 - Reduced recurring desktop support incidents through proactive maintenance and preventive support initiatives.
-

IT Support Technician (Desktop Support)

Swissport Kenya Limited | Nairobi, Kenya
November 2021 – February 2023

- Provided first- and second-line desk-side support for end users across multiple departments.
- Diagnosed and resolved hardware, software, printer, and network-related issues.
- Performed hardware break-fix, desktop deployments, and IMAC activities.
- Installed and configured Windows operating systems, Microsoft 365, and enterprise applications.
- Supported desktop imaging, user onboarding, VPN connectivity, and remote access troubleshooting.
- Managed service requests through ITSM platforms and maintained IT asset records.

Key Achievement

- Consistently met service delivery targets through efficient incident resolution and proactive user support.
-

Information Systems & IT Support Intern

Kenya Ports Authority | Mombasa, Kenya

May 2016 – September 2016

- Assisted with desktop support, user account administration, and technical troubleshooting.
- Performed hardware and software maintenance activities.
- Supported network connectivity troubleshooting and IT documentation.
- Maintained asset inventory records.

Key Achievement

- Automated reporting processes using Python, improving operational efficiency.
-
